GIT CSE102 HW03 Notes
Fall 2014
Due Date
09.10.2014, 23:59

Your program should get `row_count, column_count` and `n` from the user via console.

Sample Run:

```
Enter row_count, column_count and n.
5 5 50

(Resulting window will be drawn here using Extended ASCII
Codes)
```

Notes:

- You should submit 1 files;
  - main.c
- Add all files into a folder and compress it for submission. The folder names will be restricted to the following format:
  HW#_studentid_studentname.
  - Example:
    HW03_121044001_Abdullah_Akay
- Upload soft copy of your homework to Moodle course web page
- Submit hard copy of your assignment to Teaching Assistant within 24 hours after the soft copy submission deadline.
- Don't forget to test your code in the provided Linux virtual machine.
- Obey good programming rules (Indentation, Documenting, Well Commenting, Avoidıng magic numbers, Non-ascii characters etc.)
- **Strictly follow submission and file, folder naming rules.**
